PROFESSIONAL SUMMARY

Mobile Application Developer | React Native with 3+ years of experience in developing scalable Hybrid Mobile Applications for Android and iOS platforms. Skilled in React Native, RESTful API integration, Redux, WebSocket communication, Node.js, Express.js, and MongoDB. Experienced in building responsive mobile applications, integrating real-time features, optimizing application performance, and managing production deployments. Proficient in cross-platform mobile development, modular architecture, debugging, and Agile methodologies.

TECHNICAL SKILLS

- **Mobile Development** : React Native, Hybrid Mobile Application Development, Android Development, Android SDK, Redux, RESTful API Integration, Push Notifications, Play Store Deployment, Performance Optimization, Offline Storage, Mobile Security, WebView Integration, APK/AAB Build Generation, Application Deployment, Firebase
- **Programming Languages** : JavaScript, Java, JSON, XML
- **Tools & Technologies** : Git, GitHub, Android Studio, VS Code, Postman, Jira, Jest, CI/CD, Agile Methodology, Google Play Console, Release Management
- **Mobile Architecture & Concepts** : MVVM Architecture, Modular Architecture, Object-Oriented Programming (OOP), Application Lifecycle Management
- **Database** : MongoDB, MySQL, SQL Queries
- **Backend & API** : Node.js, Express.js, RESTful APIs, WebSocket Integration

PROFESSIONAL EXPERIENCE

Mobile Application Developer | React Native

May 2023 – Present

JDIT Software Solutions Pvt. Ltd. – Pune, India

- Developed and maintained scalable Hybrid Mobile Applications for Android and iOS platforms using React Native.
- Integrated RESTful APIs for real-time data synchronization and seamless backend communication.
- Designed reusable and modular mobile UI components, improving application maintainability and development efficiency.
- Improved application performance by reducing load time and fixing critical production issues.
- Integrated third-party React Native plugins for push notifications, device features, and real-time communication.
- Implemented mobile navigation, lifecycle management, and global state management using Redux and Context API.
- Implemented MVVM and modular architecture patterns to improve application scalability and maintainability.
- Implemented offline storage and secure local data handling using AsyncStorage and mobile security best practices.
- Developed secure authentication and session management workflows for mobile applications.
- Built responsive cross-platform mobile UI components for Android and iOS using React Native.
- Collaborated with UI/UX teams to convert Figma designs into responsive and pixel-perfect mobile interfaces.
- Resolved production issues and optimized app stability using Android Studio and Postman.
- Collaborated with designers and backend developers to deliver scalable production-ready mobile features.
- Built backend services using Node.js and Express.js with scalable MongoDB database integration.
- Participated in Agile sprints, code reviews, and Git-based development workflows.
- Developed production-level mobile applications for dating, real estate, and service-based platforms.
- Successfully deployed and maintained production-ready applications on Google Play Store.
- Managed APK/AAB generation and Google Play Store production deployments.
- Developed WebView-based mobile applications and integrated responsive web platforms into Android applications.
- Reduced production bugs by 40% through debugging, lifecycle optimization, and performance improvements.

PROJECTS

Smart-Unifolio – Cross-Platform E-Commerce Mobile Application

- Developing a cross-platform E-Commerce Mobile Application using React Native for Android and iOS platforms with scalable backend architecture using Node.js, Express.js, and MongoDB.

- Developing responsive and reusable mobile UI components using React Native.
- Implementing RESTful API integration for seamless client-server communication.
- Building backend APIs using Node.js and Express.js.
- Integrating MongoDB database for secure product and user data management.
- Developing product listing, cart management, authentication, and order management functionalities.
- Implemented secure authentication and session management functionalities.
- Integrated dynamic product search, filtering, and category-based navigation features.

Technologies Used : React Native, JavaScript, Redux, Node.js, Express.js, MongoDB, REST APIs, Android Studio, Git, GitHub, Postman

GameHubPro – Real-Time Gaming Mobile Application

- Developed a real-time gaming mobile application similar to JungleeRummy and Teen Patti platforms.
- Implemented secure authentication, wallet handling, and gameplay interaction features.
- Developed reusable and optimized UI components for smooth gaming experience.
- Integrated RESTful APIs for gameplay data and user management.
- Performed application debugging, API testing, and performance optimization for stable gameplay experience.

Technologies Used : React Native, Android, JavaScript, Redux, Node.js, Express.js, MongoDB, REST APIs

Dating Mobile Application – Cross-Platform Social Networking App

- Developed a cross-platform Dating Mobile Application using React Native for Android and iOS platforms.
- Implemented authentication, profile management, and matching functionality.
- Developed real-time chat functionality using WebSocket-based communication.
- Worked with Redux and Context API for efficient global state management.
- Consumed RESTful APIs for dynamic user interactions and notifications.

Technologies Used : React Native, JavaScript, REST APIs, WebSocket, Redux, Android, iOS

EDUCATION

Bachelor of Technology in Computer Engineering

G.H. Raisoni College of Engineering & Management, Pune

Aug 2019 – Jul 2023

CERTIFICATIONS

- Core Java Training & Certification
- MySQL & Java – HackerRank
- Problem Solving – HackerRank
